

StikCap™

StikCap™ is easy to use. It lasts for about three months, although in dirty environments it should be replaced sooner.

Firstly, peel the **StikCap™** pad from the backing sheet as in fig. 1.

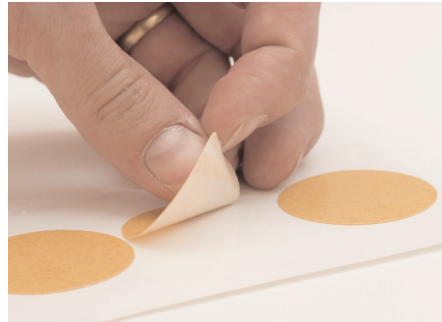

Fig. 1

Next affix the **StikCap™** pad to the inside of the lens or body cap that you are using (fig. 2).

Once you have smoothed the **StikCap™** pad in place, gently peel back the yellow tape to reveal the sticky fabric underneath (fig. 3).

Fig. 2

Replace the lens or body cap on the lens or camera.
